DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13 and 38-47, drawn to method for assessing immune response profiles of animal populations.

Group II, claims 14-37, drawn to method for ranking relative immunogenicity of two distinct proteins.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I and Group II are two distinct methods in that Group I obtains differentiated dendritic cells and CD4+ T-cells for reaction with fragments of a protein comprising peptides, whereupon the proliferation profile of the CD4+ T-cells to each peptide is assessed so as to determine stimulation indexes of the CD4+ T-cells against each of the peptide to obtain immune response profile of an animal population and Group II prepares sets of fragmented proteins comprising peptides from a first protein and a second protein, and obtains differentiated dendritic cells and CD4+ T-cells from blood of two distinct animals, and combining each of the peptide sets from each of the proteins with each of the differentiated dendritic cells and CD4+ T-cells from blood of the distinct animals to determine proliferation response of the T-cells to each peptide set from the first protein and the second protein and determine their relative immunogenicity ranking.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
